

Conrad T. Osvik

Computer Science student of 2 years with over 6 years experience. In my free time I like to program various things, play games with friends, and ski. I've been an active alpine skier at a high national level until high school.

EXPERIENCE

TIHLDE, Trondheim— *Software Developer*

September 2023 - PRESENT

Working as a fullstack developer for my student organization. I've had the responsibility of both developing a standalone item booking solution with a small group of people, as well as maintaining core infrastructure and starting development of a new backend solution.

EDUCATION

NTNU, Trondheim— *Bachelor of Science in Computer Science*

August 2023 - June 2026

Specialization in software engineering.

Sandvika VGS, Sandvika— *High School*

August 2018- June 2021

Specialization in science.

PROJECTS

Photon — *TIHLDE's new backend solution*

A Hono REST api utilizing postgres, redis, drizzle, and typescript.

CourseStats — *Course statistics for norwegian universities*

A NextJS fullstack application using sqlite, drizzle, and typescript. I use publicly available data from the HKDIR DBH api.

KontRes — *TIHLDE's booking solution*

A NextJS tRPC fullstack application using postgres, prisma, and typescript. The auth solution is tightly integrated with our backend, LEPTON.

Kvark / Lepton — *TIHLDE's frontend / backend solution*

A React SPA frontend utilizing Tanstack router and query. And a Django python backend.
